Product Environmental Profile

ClimaSys Resistance heater

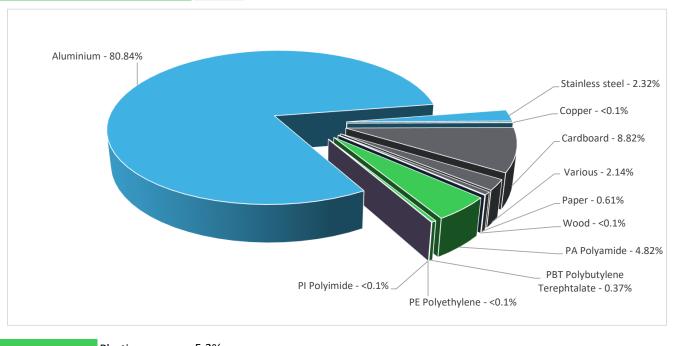

General information

Representative product	ClimaSys Resistance heater - NSYCR55WU2				
Description of the product	The main purpose of Resistance heaters to prevent the formation of condensation inside the enclosure due to high humidity or low temperature, and reheat the electrical switchboard when the temperature is too low for the components to operate correctly				
Functional unit	The resistance heaters prevent the formation of condensation and guarantee the ideal temperature for the correct operation of the electronic components in the enclosure during 10 years. Power = 55W Voltage = 110-250 V AC Ambient air temperature for operation = -4070 °C Product dimensions H200 mm X W85 mm X D70 mm IP degree of protection = IP20				

Constituent materials

Reference product mass

539.33 g including the product, its packaging and additional elements and accessories

 Plastics
 5.2%

 Metals
 83.2%

 Others
 11.6%

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 2 January 2013, amended in March 2015, 2015/863/EU and in November 2017, 2017/2102/EU) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers – PBDE), Bis (2-ethylhexyl)phthalate - DEHP, Benzyl butyl phthalate - BBP, Dibutyl phthalate - DBP, Diisobutyl phthalate - DIBP) as mentioned in the Directive

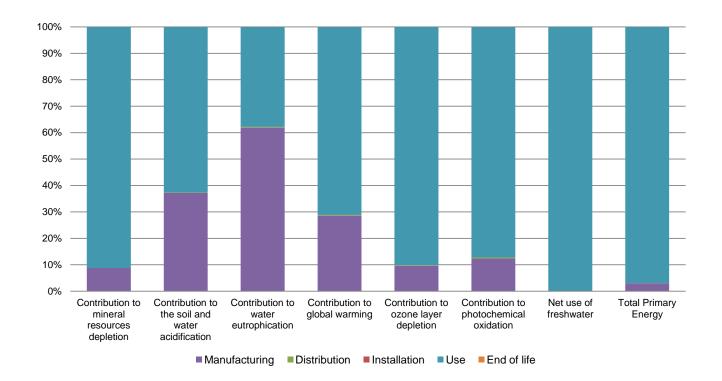

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page

Additional environmental information							
	The ClimaSys Resistance heater presents the following relevent environmental aspects						
Manufacturing	Manufactured at a production site complying with the regulations						
	Weight and volume of the packaging optimized, based on the European Union's packaging directive						
Distribution	Packaging weight is 47.7 g, consisting of Cardboard (99.809%), wood (0.191%),PI Polyimide(0.000001%)						
	Product distribution optimised by setting up local distribution centres						
Installation	The product does not require special installation procedure and requires little to no energy to install. The disposal of the packaging materials are accounted for during the installation phase (including transport to disposal).						
Use	The product does not require special maintenance operations.						
	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials						
End of life	No special end-of-life treatment required. According to countries' practices this product can enter the usual end-of-life treatment process.						
	Recyclability potential: 83%	Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).					

Environmental impacts

Reference life time	10 years						
Product category	Other equipments - Active product						
Installation elements	No special installation components need during installation phase, but transport of packaging to disposal and disposal of packaging accounted for during installation.						
Use scenario	The product is in active mode 50% of the time with a power use of 55W and in Off mode 50% of the time for 10 years						
Geographical representativeness	Europe						
Technological representativeness	The Modules of Technologies such as material production, manufacturing process and transport technology used in this PEP analysis (LCA-EIME in this case) are Similar and representative of the actual type of technologies used to make the product in production						
	Manufacturing	Installation	Use	End of life			
Energy model used	Energy model used: China	Electricity Mix; AC; consumption mix, at consumer; < 1kV; EU-27	Electricity Mix; AC; consumption mix, at consumer; < 1kV; EU-27	Electricity Mix; AC; consumption mix, at consumer; < 1kV; EU- 27

^{*} represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version EIME v5.9.1, database version 2016-11 in compliance with ISO14044.

The Manufacturing phase & Use phase are impacting equally on Indicator of Acidification potential of soil and water (total average for Europe), Eutrophication (fate not incl.). The use phase is the life cycle phase which has the greatest impact on the rest of environmental indicators (based on compulsory indicators).

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.
